

MAP Assessment Data

About the chart:

- The grade designations represent beginning-of-year grade levels.
- The RIT score is compared according to the 2015 percentile range.
- Find the student's test category and grade level column in the chart. Then find the student's RIT score.
- Student's score will reflect if they are above, even, or below the median RIT score.
- The RIT score will allow us to identify students for instructional support.
