WELCOME

Dear Supporters of Blanchet Catholic School,

Welcome to the Blanchet's 2022 True Blue Gala! It is so wonderful to be back in person for this year's event as we come together to celebrate all things Blanchet. This event is always a highlight of the school year but this year's Gala feels even more special as we gather together as a community for the first time since October of 2019.

As the school's largest annual fundraiser, our True Blue Gala generates funds that help support the various programs of our school. This event is made possible through the substantial efforts of our families and the hard work of our staff. Thank you to all of our families who contributed items or donated money to support our efforts tonight.

Your attendance and support of our annual Gala allows Blanchet to continue to offer an outstanding Catholic, college-prep education. In addition, the funds generated tonight will help our school continue to grow and develop additional programs in the future.

The focus for the "Embrace the Potential" at this year's Gala is our new STEM wing that will add six new classrooms/labs to our school facility. Construction for this project started this month with an estimated completion date of December 2022. This year's paddle raise will help cover the cost of outfitting the classrooms with desks, supplies, technology, and other materials. Please consider making a donation to support this significant facility improvement for our students and staff.

Thank you for attending tonight's Gala. We greatly appreciate your support of this event and your continued support of Blanchet Catholic School.

By Courage & Faith,

OUR AUCTIONEER

Mike Jungers

Mike Jungers grew up in the small town of Enumclaw, WA. In 2003, Mike began working with his father, Jim, as a bid spotter. Not only did he follow in his father's footsteps, but those of his grandfather, Mike, making him a third-generation auctioneer. He joined Stokes Auction Group in 2005 and attended the Western College of Auctioneering in 2016. Over the years, Mike has developed a knack for reading the crowd and is able to create an atmosphere that is ripe with comedy and generosity. In Mike's opinion, everything about the event is a victory that should be

celebrated and he hopes that when everyone leaves, they can't wait to come back for the next event.

Thanks to the generosity of Mountain West Investments and the Larry and Jeanette Epping Family Foundation, Blanchet has already raised a significant amount of the money needed to complete this exciting project. Construction has begun and we anticipate moving into the new classroom/lab spaces by January 1, 2023. Our goal is to raise \$150,000 to outfit our new STEM classrooms and support the construction of the building so that we can offer our students more innovative educational opportunities in both STEM classes and clubs as well as improved facilities for staff teaching and development. NEW STEM WING

Coming Soon!

As advances in science, technology, engineering and math grow, so does the need for schools to strengthen their educational programs. Blanchet is dedicated to enhancing the school's STEM program and offering more opportunities for students to have hands-on and minds-on courses. Preparing our students for the future is at the forefront of our mission.

Thanks to the incredible generosity of donors, Blanchet's STEM program will soon be moved into a new facility. Blanchet Catholic School is pleased to announce the construction of a new STEM wing. This new facility will provide our students and staff with innovative classrooms/lab spaces and equipment needed to provide quality college prep curriculum for years to come. The STEM wing will allow Blanchet to create new opportunities for our students and grow our program at both the high school and middle school levels.

Here are some of the details about the STEM wing:

The STEM wing will include six new classrooms, including four science-specific classrooms/labs that will provide additional space for students to experience science and conduct labs in a state-of-the-art facility. The other two new classrooms will host other STEM classes in the areas of mathematics and technology. These new classrooms will be used by both middle and high school students.

Construction of the STEM wing will begin spring 2022 with plans for the classrooms to be usable during the 2022-23 school year.

Once construction begins, the process is estimated to take 7-8 months.

The current science classrooms will be modified to accommodate the increase in our enrollment and house other Blanchet classes that are currently being held inside our main building.

The funding for this project has been generously supported by a few of Blanchet's long-time donors who see the significant value in further developing our campus facility and supporting programs related to STEM. Additional funds will be raised to furnish the new classrooms and support the programs in this new facility. The 2022 True Blue Gala, Blanchet's annual benefit auction, will focus its fund-a-need portion of the event on raising those additional funds.

The logo is a circular seal. The outer ring contains the text "ANIMO ET FIDELIA" at the top and "CAVALIERS" at the bottom, separated by two small diamond shapes. Inside the ring is a light blue circle. Overlaid on this is a shield with a white border. A large, stylized white cross is centered over the shield. The text "Thank you for your support of Blanchet Catholic School. We hope you enjoyed your evening!" is written in a bold, black, serif font across the center of the shield and cross.
